

Surface Solutions Hits "Black Gold"

When Surface Solutions was approached by Tenaris (oil rigging manufacturer) to address their flooring needs, Surface Solutions "Drilled Deep" to meet the customer's high expectations. Surface Solutions transformed 7,000 SF of deteriorated, oil saturated concrete with a 3/8" UCRETE HP Flooring System. Tenaris needed a flooring solution for its manufacturing area which could withstand constant abrasion, impact, resistant to slipping but was also easy to clean. Furthermore, Tenaris needed a quick three day turnaround time. Surface Solutions recommended UCRETE HP, a 3/8" urethane concrete resurfacer, consisting of a rapid two step installation for the manufacturing areas. UCRETE HP stands up well to fork lift traffic and heavy drops while maintaining a non-slip, cleanable surface. Surface Solutions accomplished the entire project on schedule within the customer's three day time frame. Surface Solutions exceeded the customer's expectations through a rapid turn-key installation, quality in house installation, and a single source warranty.
